GOLD, CARNELIAN

ROMANO-BRITISH

LATE 4TH OR EARLY 5TH CENTURY AD

SIZE: 53 (EU) M 1/2 (UK) 6 1/2 (US)

WEIGHT: 8.3 GRAMS

**LITERATURE**

FINGER RINGS OF THIS INTRICATE FILIGREE TYPE WITH SPIRAL-FORM ORNAMENTATION ARE WELL-REPRESENTED IN LATE ROMAN BRITAIN. EXAMPLES ARE FOUND BOTH AS ISOLATED FINDS AND IN SIGNIFICANT HOARDS OF HIGH-STATUS OBJECTS FROM THE LATE 4TH AND EARLY 5TH CENTURIES, NOTABLY THETFORD (NORFOLK) AND HOXNE (SUFFOLK).

THESE RINGS ARE DISTINGUISHED BY BANDS COMPOSED OF ROUND, BEADED, AND SEMI-BLOCK-TWISTED WIRES, EMBELLISHED WITH APPLIED GRANULES AND COILED SPIRALS, PARTICULARLY LARGE ADORNED S-SCROLLS AT THE SHOULDERS. OUTSIDE BRITAIN, SUCH RINGS ARE UNCOMMON; BRITISH EXAMPLES ARE NOTEWORTHY FOR THEIR TIGHTLY COILED SPIRALS. THE PRESENT RING CLOSELY RESEMBLES THREE DOCUMENTED PIECES FROM HOXNE, HOUGHTON (HAMPSHIRE) AND BROMLEY (ESSEX). ALL SHARE KEY CHARACTERISTICS: SPIRALS FORMED FROM STRIP-TWISTED ROUND WIRES, BANDS EDGED WITH SEMI-BLOCK-TWISTED WIRES, AND A CENTRAL GOLD STRIP WITH A CONVEX V-PROFILE PROMDING STRUCTURE IN LIEU OF A BACKING SHEET. THE PRESENT AND BROMLEY RINGS ARE SO SIMILAR THAT THEY MAY ORIGINATE FROM THE SAME WORKSHOP, DIFFERING PRIMARILY IN THE BEADED-WIRE EDGING OF THE BOX SETTING AND 'KEELED' SHOULDERS. THE PREVALENCE OF SUCH RINGS IN BRITAIN LIKELY REFLECTS HEIGHTENED LOSS AND HOARDING DURING THE DECLINE OF ROMAN RULE. WITH ITS MILITARY EAGLE INTAGLIO, THIS RING MAY EVEN BE CONNECTED TO THE WITHDRAWAL OF ROMAN GARRISONS BETWEEN 383 AND 406.
